Summary

Total providers documented: 59

Connectors implemented (all statuses): 31

Live-tested against real APIs: 13
Connector code ready, API key required: 11
Not implemented (commercial/restricted): 26
Blocked (403/access denied): 1
Unavailable (service down): 1

Egress Policy

GFIN uses hostname-based egress allowlists, not static IP lists. Provider IPs change due to CDN/cloud infrastructure. All connectors store: API hostname, allowed paths, TLS policy, certificate validation, and DNS policy.
